Bulbs Compatible with the **adorne® Touch Wi-Fi Ready Master Tru-Universal Dimmer (ADTH700RMTU)**

Disclaimer: Variations in bulb or lamp design and construction, as well as other external factors, can impact the performance of any dimming device. Bulb manufacturers can modify their products at any time, without notice to Legrand. We are therefore unable to ensure indefinite compatibility with any bulb or fixture. For up-to-date specifications, performance, and/or any related recall information about a specific dimmable bulb, please visit the bulb manufacturer's website.

This compatibility guide provides a detailed listing of bulbs that have been tested and deemed compatible with Legrand dimming devices as of the time of testing. At the time this data was compiled, there was full compatibility based on testing within a lab environment, which included optimal infrastructure and conditions for dimming performance. Performance issues in the field due to variables such as voltage, infrastructure, or line noise caused by adjacent loads, are possible. This document is intended as a comparative aid, and the details within are subject to change at any time. Legrand does not guarantee that (a) the list of manufacturers is all-inclusive; (b) the information contained is complete, up-to-date, accurate and/or error-free; (c) the products and Legrand controls listed will always be compatible; and (d) that the information provided will be a viable or appropriate solution for your project needs.
